

Occupation, model tables

March 13, 2024

Table 1: Elasticities of labor supply using different experiments

	Change in gross wages	Change in income tax rate
Marshallian elasticity of labor supply	1.698	1.571

NOTES: All the elasticities are computed for the same change in net wages.

Table 2: Lifecycle model: counterfactual experiments

	Pension gender gap	Women's labor hours	Women's labor participation (%)	Women in marginal jobs (%)	Welfare gain wrt baseline
Baseline	0.20	14.11	67.27	23.76	0.0
Caregiver credits	0.17	17.78	74.99	14.61	0.17
Lower income taxes	0.20	17.69	73.45	15.66	0.18
Pension points + taxes for mini-jobs	0.11	17.69	76.45	17.42	0.18
Caregiver credits, no upper threshold	0.17	17.79	73.58	15.47	0.18

NOTES: The experiments in the last three rows imply the same government deficit.

Welfare gains = increase in consumption at baseline to be indifferent with the experiment under analysis.
