

Occupation, model tables

March 9, 2024

Table 1: Elasticities of labor supply using different experiments

	Change in gross wages	Change in income tax rate
Marshallian elasticity of labor supply	1.698	1.571

NOTES: All the elsticities are computed for the same change in net wages.

Table 2: Lifecycle model: counterfactual experiments

	Pension gender gap	Women's labor hours	Women's labor participation (%)	Women in marginal jobs (%)	Welfare gain wrt baseline
Baseline	0.57	7.68	37.70	11.78	0.0
Caregiver credits	0.55	11.50	50.93	9.16	0.13
Lower income taxes	0.56	12.50	54.69	11.79	0.17
Pension points + taxes for mini-jobs	0.55	9.26	50.18	22.36	0.46
Caregiver credits, no upper threshold	0.55	11.30	49.21	9.58	0.11

NOTES: The experiments in the last three rows imply the same government deficit.

Welfare gains = increase in consumption at baseline to be indifferent with the experiment under analysis.
