

Occupation, model tables

February 16, 2024

Table 1: Elasticities of labor supply using different experiments

	Change in gross wages	Change in income tax rate
Marshallian elasticity of labor supply	1.698	1.571

NOTES: All the elsticities are computed for the same change in net wages.

Table 2: Lifecycle model: counterfactual experiments

	Pension gender gap	Women's labor participation	Welfare gains wrt baseline (euros)
Baseline	0.426	0.660	0.0
Caregiver credits	0.405	0.724	1616
Lower income taxes	0.417	0.814	3030
Caregiver credits, no upper threshold	0.392	0.744	2222

NOTES: The experiments in the last three rows imply the same government deficit of 106 euros. Welfare gains = equivalent transfer in baseline model at age 30.
